

# CASE STUDY

**CBM**  
embracing a broken world  
through word & deed

## Canadian Baptist Ministries

Not-for-Profit

### MISSION:

Primary mission is to partner with local churches around the world to bring hope, healing, and reconciliation through word and deed, and are dedicated to developing sustainable ministries with their partners which enable them to increase their long-term capacity.

### HOLDING THEM BACK

Struggled with providing transparency and accountability from their legacy DOS-based system, Accpac. The software was too cumbersome to allow them to optimize fund and grant management, provide budgetary control, or manage complex reporting requirements. Specific issues arising between their financial and donor management systems. There was a lot of manual intervention needed to manage grant and funding related processes and it was taking them long periods of time to close the books. Also partially paper-based, took lots of time and manual effort was needed.

### HOW WE HELPED:

Implemented Sparkrock Finance Management system. You can see exactly where you stand in regards to financials and revenue.

### HOW THEY NOW LEVERAGE:

Can now easily access up-to-the-minute financial information. More time and resources to spend on their programs and provides better services and support to the people they serve around the world.

*“ The Sparkrock solution works really well because it's fully integrated, right from revenue back into the back end. As soon as you have a piece of information the data is there and you can see exactly where you stand in regards to financials and revenue. ”*

*– Rob Jackett, Director of Administration*
